- Bootstrap
- Gulp

## Soft Skills

- Trello, Asana
- Teamwork
- Strong self-organization
- Critical thinking

## Languages

- Ukrainian (native)
- English (B2)
- German (A2)

## Profile

As a front-end developer, I focus on creating high-quality user experiences. I specialize in transforming designs into functional websites and stay up to date with the latest trends and technologies.

I have earned certificates for successfully completing front-end development courses, where I gained hands-on experience with HTML5, CSS3, JavaScript, as well as popular frameworks like React.js and Vue.js.

I uphold a high level of professional ethics and strive for excellence in every project I work on.

## Work Experience

### Front-end developer
**2024 — 2025**

Pet Projects

- Developed a series of websites, including 12 landing pages and 3 multi-page websites.
- Implemented responsive design, added animations, and performed error checking for all websites.

### Front-end developer

Teamwork
**2024**

- Developed one of the pages for a multi-page website as part of a group project on GitHub, using the React.js framework.
- Ensured clean and maintainable code by applying linting and adhering to coding standards. Conducted debugging and issue resolution, improving the website's stability and performance.
