Profile

As a front-end developer I have a strong foundation in React.js, Vue.js, and JavaScript. I specialize in building responsive, high-performance web applications with a keen eye for UX/UI design.

My focus is on clean, maintainable code, performance optimization, and accessibility.

Always eager to learn, I stay updated with modern front-end tools and best practices.

Work Experience

Front-end developer
2023 — 2024
(Freelance & Personal Projects)

- Built over 10 web applications using HTML5, CSS3, JavaScript, React.js, Vue.js.
- Ensured clean and maintainable code by applying linting and adhering to coding standards. Conducted debugging and issue resolution, improving the website's stability and performance.
- Ensured full responsiveness and cross-browser compatibility.

Front-end developer
2024
(Team-Based Project, Open Source Contribution)

- Collaborated with a team of developers to create a multi-page website using React.js and GitHub.
- Developed a key feature/page, ensuring pixel-perfect implementation of UI components.
- Maintained code quality with ESLint, Prettier, and Git version control.

Junior front-end developer
2024 — 2025
(Gzstudio)

- Built and maintained websites, implemented responsive designs and ensured cross-browser compatibility.
- Updated and optimized websites content to meet design and performance standards.
